Sounds great. But how did you know I was considering calling you? On my To Do list I created for today, that was one of my items – review files on Smurfit and contact you. I'm open tomorrow all day, and Wednesday all day except from 11:00 – 11:30. What's best for you?

- Richard

Hi Richard. Do you have some time this week to talk about Smurfit, and the whole lead process? I have good availability tomorrow, Wednesday and Friday. I hear through the grapevine that there is a potential buyer for the site, I will learn more about it today.

Geoff Brown
State On-Scene Coordinator

Hello Ken, Randy and Richard.

Geoff, Bryn, Chris and I all met last week and have determined that Geoff will be the DEQ project manager for the Smurfit Mill Site in Newberg and Chris will be the DEQ project manager for the M&M Recyclers Site in Woodburn.

Bryn has worked with EPA on several removals in the past but is tied up on other projects, so he will be a resource for Geoff and Chris regarding the process and roles DEQ plays in these removals.

Geoff and Chris will be in contact with Randy and Richard regarding next steps, such as the need for a referral memo, etc.

DEQ is looking forward to partnering with EPA on these projects.

Mike

Thanks, Ken.

Sorry for the delay – we've been responding to a spill on the North Santiam River since Sunday so things have been a tad crazy around here. In fact, as you probably already know, Richard Franklin is the Federal On Scene Coordinator on the spill and is currently working with Chris Richardson, Bryn Thoms and Geoff Brown on the response.

We will coordinate with Randy and Richard on M&M Recyclers and Smurfit Mill and once that has taken place and we have a better handle on how to move these sites forward, we will determine who will be the DEQ project manager for each site and make plans to proceed.

Thanks,

Mike

Hi Mike, Anne, Christian,

As you know we have been working closely with Oregon DEQ to identify possible EPA lead removal actions in the state of Oregon. From the state list of five possible sites, two were eliminated: Time Oil (part of Portland Harbor, prospective purchaser agreement in process) and Johnson Oil (petroleum only). The remaining sites: M&M Recyclers, and Smurfit Mill look like good candidates. Permapost was a late addition which the OSCs have yet to evaluate, but remains a possible candidate.

The purpose of this email is to facilitate further coordination between ODEQ project managers for these sites and EPA OSCs based in the Portland office. I have passed on ODEQ project manager contact information and links to the ECSI site database for each site to Richard Franklin and Randy Nattis, our Oregon OSCs. Richard and Randy are very busy and frequently in the field, but I encourage you to reach out and initiate conversations to move these sites forward. Richard and Randy's email is included in the cc list above. Phone numbers:

Randy Nattis: M&M, and Permapost (Randy and Richard will figure out which contact is most appropriate)
503-628-9419

Richard Franklin: Smurfit Mill and Permapost 503-326-2917

This coordination has been very productive, and we look forward to making progress on these sites!

Thanks! Ken
